

Revolutionizing classroom communication for students and teachers

Async is a feature-packed platform designed to foster meaningful engagement between students and teachers. By providing intuitive tools for discussions and class organization, Async enhances the way classrooms collaborate and communicate.

Interactive Discussion Boards

Facilitate engaging and streamlined discussions

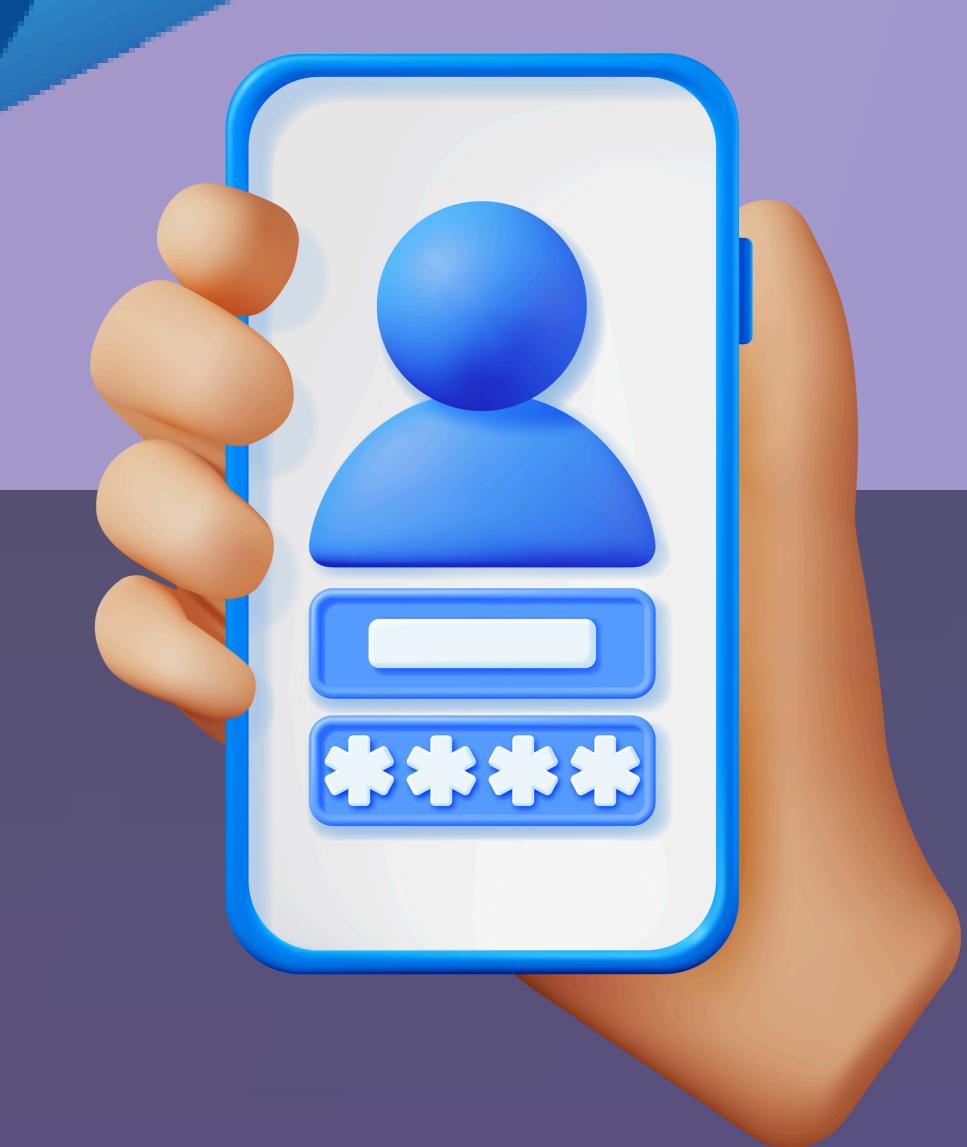

Organized Class Dashboard

Access all your discussions in one place, with filtering options for easy navigation

Rich Text Editor

Share high-quality, formatted content seamlessly

Secure Login

Powered by Firebase for a safe and secure user experience

Technical Architecture

- Front End : React.js with Tailwind CSS for a responsive and sleek user interface.
- Backend : Node.js with Fastify for robust and efficient performance.
- Database: Firebase for real-time data synchronization and cloud-based storage.

Expected Outcomes

A robust, user-centric platform for classrooms that bridges the gap in discussion and communication tools, empowering users with intuitive navigation, responsive design, and real-time interactions.
